

## October 2005

## Name:

Payment = \$0.50 / Acre / Year to use chaff spreaders to improve nutrient and herbicide placement in the field. The payment applies only to those acres harvested using chaff spreader attachment on combine(s).

Chaff spreaders include any attachments to the combine that will evenly distribute chaff over the harvested swath. These attachments can be factory or aftermarket designs as long as the overall goal of chaff spreading is accomplished.

**Documentation Required:** Farmer or crop consultant certification of appropriate chaff distribution. Use the following Table for documentation. An example is provided.

[illegible]

**I certify that I have used a chaff spreader on the fields and crops listed above.**
